Compsee's Mobile Application Terminal
Scan Demo Overview
Version 1.2.2
050407

Compsee's M.A.T. Scan Demo Package is designed to provide the capability to scan a barcode label and retrieve the barcode data and symbology type.

This document is provided as a quick review of the MAT Scan Demo Package release history. Additional information related to functionality of this package is available in the Help Files subfolder located on the Mobile Application Terminal Support CD and also from the Compsee Web Site. http://www.compsee.com/Products/MAT/MAT-ProductSupport.htm(File: MAT-SD-RG.pdf) If you have questions, please contact Compsee Technical Support at 800.628.3888 or support@compsee.com.

MAT Scan Demo v1.2.2 Details
Improvements List:
- o Incorporate MultiApp Control v2.0.0.0 to verify that the application is not currently running before opening an additional instance.
- o Incorporate SystemParms Control v2.0.0.0 to retrieve platform specific information from the mobile device and load Company Information for the specific Platform Type.
- o Incorporate KeySend Control v2.0.0.0 to set its default namespace.
