If you have questions, please contact Compsee Technical Support at 800.628.3888 or support@compsee.com.

Installing SDKs

Embedded C++ SDK:

1. Close eMbedded C++
2. If applicable, uninstall the existing C++ MAT SDK by double-clicking the installation program (*.msi) or remove the program using the Add-Remove Programs option from the Control Panel.
3. Double-click the installation program (*.msi) that you want to install. Run the msi file in the eMbedded C++ directory.
4. Open eMbedded C++ and verify that the new device is listed.
