

Apex III & IV *Technical Bulletin*

RemDisk / Remserve Installation and Operation

Scope:

This Technical Bulletin will provide information necessary to use the DataLight ROM DOS RemDisk / RemServ communications utilities with the Apex.

Installation:

Compsee has provided an installation program for this Utility that will make all necessary edits to the user's Autoexec.bat file in Windows 98 (Config.sys in Windows 95) and also assists the user in the correct serial port selection (com 1, 2, 3 or 4).

Removal:

The RemDisk program can be terminated by going to a DOS prompt and entering in the command Remdisk /U

The RemDisk utility can be removed from your autoexec.bat by deleting the line in the file that reads: RemDisk

After removing this file from the Autoexec.bat file the RemDisk.exe file can also be deleted from the user's root directory on their C: drive.

P.C. Operation - Compatibility – Other requirements:

Using these two utilities require you to boot your P.C. with the Remdisk as an executable in your P.C.'s Autoexec.bat file. RemDisk cannot be executed in a DOS window or DOS command line.

This utility has been tested and found to run correctly under Microsoft Windows© 95 & 98. The Utility will not correctly work with Microsoft Window Millennium, NT or 2000.

This utility is backward compatible with all released Apex Operating System version.

Technical Assistance:

Users requiring Technical Assistance should contact Compsee Technical Support at **1-800-628-3888**. Technical questions can also be e-mailed to sales@compsee.com.
